

COVID-19 (Jan-Jul, 2020) Dashboard Overview

Author → James Imbuido

Overview

This Tableau project is a dashboard that provides an overview of the COVID-19 pandemic from January to July 2020. The dashboard includes data on confirmed cases, deaths, active cases, and recovered cases, as well as a comparison of total cases by continent and country.

Data

The data for this dashboard is likely from the World Health Organization (WHO) COVID-19 Situation Reports. These reports are published daily and include data on the number of confirmed cases, deaths, and recovered cases, as well as the number of countries and territories affected.

Visualizations

The dashboard uses a variety of visualizations to present the data. These include:

- Cards → The dashboard uses cards to display key metrics, such as the number of confirmed cases, the number of deaths, and the number of active cases.
- Lines → The dashboard uses lines to show trends over time. For example, the dashboard shows a line chart of the number of confirmed cases over time.

- Maps → The dashboard uses a map to show the comparison of total cases by continent.
- Tables → The dashboard uses tables to show detailed data. For example, the dashboard shows a table of the number of confirmed cases, deaths, and recovered cases by country.

Target audience

This dashboard is for anyone who is interested in learning more about the statistics derived from the COVID-19 pandemic. The dashboard is easy to use and understand, even for people who are not familiar with Tableau.

Overall

This Tableau project is a well-designed and informative dashboard that provides a valuable overview of the COVID-19 pandemic from January to July 2020. The dashboard is easy to use and understand, and it uses a variety of visualizations to present the data in an engaging way.
